CAREER OBJECTIVE

To work on impactful AI and data-driven projects that combine research and practical applications, while developing strong technical and analytical expertise.

EDUCATION

VNR Vignana Jyothi Institute of Engineering & Technology

B.Tech in Computer Science (AI & ML)

May 2027 (Exp)

CGPA: 8.68

CBSE Board (Class XII)

Senior Secondary (CBSE)

2023

Percentage: 92%

TECHNICAL SKILLS

Programming: Python, C++, JavaScript, SQL, C

Databases: Neo4j, MongoDB, PostgreSQL

Tools: Docker, AWS (EC2, Lambda), Git, Figma, Tableau, Postman, GraphML

Profiles: LeetCode - r1z3lTHTp9, Smart interviews - Spoorthy_Boga

Frameworks: Node.js, FastAPI, Flask, React, Next.js

OS: Windows, Linux (Ubuntu)

Libraries: LangGraph, TensorFlow, Keras, XGBoost, Scikit-learn, Pandas, NumPy

CERTIFICATIONS

- C++ DSA and Full-Stack Development — Apna College.
- Diffusion Models — AICTE Certified.
- Tableau Professional Certification — Internshala.
- NPTEL Certification in Operating Systems.

EXPERIENCE

Machine Learning Intern — Infosys Springboard

Sep 2025 – Dec 2025

Python, ML, XGBoost, Data Engineering

- Developed AI-ImpactSense, a machine learning model to classify earthquake hazard levels using seismic parameters such as magnitude, depth, and PGA.
- Built and optimized geospatial and numerical feature pipelines and performed hyperparameter tuning on XGBoost to improve model accuracy and reliability.
- Conducted data preprocessing, validation, and performance evaluation to ensure robust and scalable model deployment.

Backend Developer Intern — Lynk (Early-Stage Startup)

May 2025 – Sept 2025

MERN Stack, REST APIs, MongoDB

- Designed and developed scalable backend services for a therapy booking platform with dynamic availability and session management workflows.
- Implemented, tested, and deployed RESTful APIs on MongoDB Atlas to support secure and efficient data handling.
- Collaborated with cross-functional teams to deliver reliable, production-ready features.

PROJECTS

Daksha — Agentic Underwriting & Risk Platform

2026

LangGraph, FastAPI, EBM Models, OCR, React

- Built a multi-agent orchestration system using LangGraph for automated loan and insurance underwriting.
- Developed an integrated pipeline with KYC verification, OCR extraction, compliance (RAG), and fraud detection.
- Integrated Explainable Boosting Machines (EBM) with an LLM-based transparency agent for clear decision rationales.

Legacy-Compatible Onboard Wildfire Alerting

2025

Python, MobileNetV2, CCSDS Telemetry, Edge AI

- Designed an onboard wildfire detection system for legacy satellites using MobileNetV2.
- Optimized CNN inference using INT8 quantization for space-grade processors such as LEON3.
- Developed a CCSDS-compliant alert packet for low-bandwidth downlink transmission.

Smart Irrigation System — Geometric Optimization

2024

Arduino, C++, IoT, Mathematical Modeling

- Designed a hexagonal sensor topology to maximize coverage and eliminate monitoring gaps.
- Applied geometric progression for vertical soil moisture stratification.
- Reduced water consumption using a weighted index to filter evaporation noise.

ACHIEVEMENTS & LEADERSHIP

Academic

- Co-authored research papers on satellite-based Edge AI and IoT precision agriculture systems that are currently under peer review.
- Secured CBSE Class XII School Topper status by achieving 92%.

Co-Curricular & Leadership

- Secured 1st place in Space Quiz at AP Space Tech Summit.
- Presented our project on wildfire prediction at AP Space Tech Summit.
- Served as Product Owner for Agile PBL at Alfago Research by leading a Scrum team across four sprints and managing project backlogs and user stories.
- Currently serving as the Google Developer Groups (GDG) On-Campus Coordinator at VNRVJIET, organizing technical events and managing student outreach.
- Ranked among the top 1,000 teams out of 83,000+ participants in the Amazon ML Challenge 2025 with SMAPE score of 50.1.
- Won a prize at Innovathon 2025 for developing a multi-agent AI system for Explainable Risk prediction.
- Elected as Head Girl in Class XII for demonstrating strong leadership, discipline, and organizational skills.

Extra-Curricular

- Secured second place in a Bug Bounty competition held at BVRIT by debugging over 28 programs.
- Achieved second place in the Startup Race competition, pitched a solution for smart electricity usage.
- Received the Model United Nations Special Mention Award twice.

STRENGTHS & HOBBIES

Strengths : Collaborative Leadership, Persuasive Communication, Emotional Intelligence, Critical Thinking, Adaptability

Hobbies : Reading, Tennis.
